

Webinar: The EU Data Strategy and the Draft Data Governance Act

May 19th, 16:00pm (IST)

[Registration >>](#)

The draft Data Governance Act is one of the proposed measures for implementing the EC's 2020 European Strategy for Data, which aims at giving the EU a competitive advantage by enabling it to capitalize on its vast quantity of data. The Data Governance Act will establish a framework for providing access to government data, regulating data intermediaries that provide data sharing services, and data altruism.

[The Webinar will discuss the European Union's Strategy for Data and the draft Data Governance Act.](#)

Moderators:

Prof. Assaf Hamdani, Law Faculty, Tel Aviv University

Limor Shmerling Magazanik, Managing Director, Israel Tech Policy Institute
